# Introduction to the Space Environment

**PH 2514**

By R. C. Olsen - January 2003

<b>CHAPTER 1</b>	<b>REVIEW OF SOME BASIC PHYSICS CONCEPTS</b>	<b>1</b>
<b>A</b>	<b>The Electromagnetic Spectrum</b>	<b>1</b>
<b>B</b>	<b>Sources of Electromagnetic Radiation</b>	<b>3</b>
1	Line spectra	3
2	Black body radiation	11
3	X-rays - Bremsstrahlung	14
<b>C</b>	<b>Kinetic Theory</b>	<b>15</b>
1	Temperature and Kinetic Energy	15
2	Maxwellian Distributions	15
<b>D</b>	<b>Plasmas</b>	<b>17</b>
1	Phases of matter	17
2	Plasma Parameters	17
3	Definition of Plasma	20
4	Plasma Theories and Approximations	21
5	Orbit theory - Motion of Charged Particles	22
6	A few results from the magneto-hydrodynamic approximation	28
<b>E</b>	<b>References</b>	<b>31</b>
<b>F</b>	<b>Problems</b>	<b>32</b>
<b>CHAPTER 2</b>	<b>THE SUN</b>	<b>35</b>
<b>A</b>	<b>Introduction</b>	<b>35</b>
<b>B</b>	<b>A few facts about the quiet sun</b>	<b>35</b>
<b>C</b>	<b>The Structure of the Sun</b>	<b>37</b>
<b>D</b>	<b>Solar Atmosphere</b>	<b>41</b>
1	Chromosphere	42
2	Transition Region	43
3	The Corona	44
<b>E</b>	<b>Solar Magnetism</b>	<b>49</b>
1	Introduction	49
2	Sunspots	49
3	Sunspot Number and the Solar Cycle	51
<b>F</b>	<b>Solar Activity</b>	<b>55</b>
1	Prominences	55
2	Solar Flares	57
3	Coronal Mass Ejections	60
<b>G</b>	<b>Energy Production in the Sun</b>	<b>61</b>
<b>H</b>	<b>References</b>	<b>63</b>
<b>I</b>	<b>Problems</b>	<b>64</b>

<b>CHAPTER 3 THE SOLAR WIND</b>	<b>67</b>
A Basic Characteristics	67
B The "Supersonic" Solar Wind	69
C The Interplanetary Magnetic Field (IMF)	72
D Sector Structure	76
E The Source of the Fast Solar Wind	78
F Interplanetary Shocks	79
G References	81
H Problems	82
<b>CHAPTER 4 THE GEOMAGNETIC FIELD</b>	<b>85</b>
A Introduction	85
1 Constituents of the Geomagnetic Field:	85
B Main Geomagnetic Field	87
1 The Dipole Field	87
2 International Geomagnetic Reference Field	89
3 Magnetic Coordinate Systems	92
4 Dynamo Theory of the Main Field	94
C Time Variations of the Geomagnetic Field	95
1 Diurnal Variations	95
2 Magnetic Storms	96
3 Magnetic Indices	99
D References	102
E Problems	102
<b>CHAPTER 5 THE MAGNETOSPHERE</b>	<b>103</b>
A Introduction	103
B Plasma Physics	104
1 The Magnetic Moment and Mirroring	104
2 Drifts	109
3 Characteristic Time Scales	110
4 McIlwain L and Invariant Latitude	112
C Magnetosphere structure	114
D Bow Shock:	114
E Magnetopause	115

<b>F Geosynchronous Orbit - The Plasmasphere and the Plasma Sheet</b>	<b>117</b>
<b>G Magnetospheric Convection</b>	<b>121</b>
<b>H The Radiation Belts</b>	<b>123</b>
1 The Van Allen Radiation Belts	123
2 The Ring Current	126
3 The geocorona	127
4 Ring Current Decay and Composition	127
<b>I Problems</b>	<b>131</b>
<b>CHAPTER 6 THE ATMOSPHERE</b> <span style="float: right;"><b>135</b></span>	
<b>A Introduction</b>	<b>135</b>
<b>B Law of Atmospheres: Pressure and Density</b>	<b>135</b>
<b>C Temperature of the Atmosphere</b>	<b>139</b>
<b>D Composition of the Atmosphere</b>	<b>141</b>
<b>E Transmission of Electromagnetic Waves Through the Atmosphere</b>	<b>144</b>
<b>F Problems</b>	<b>147</b>
<b>CHAPTER 7 THE IONOSPHERE</b> <span style="float: right;"><b>149</b></span>	
<b>A Introduction</b>	<b>149</b>
<b>B Formation of an Ionospheric Layer (Chapman Theory)</b>	<b>152</b>
1 Solar Intensity	153
2 Peak Altitude	153
3 Peak Production Rate	154
4 Production Rate	155
5	155
6 Loss Processes	156
<b>C Ionosphere morphology - Altitude Structure</b>	<b>156</b>
1 D-region: 60 km to 90 km.	156
2 E layer: 90km-140 km:	157
3 F-region: 140km-1000km	159
<b>D Ionosphere morphology - Latitude Structure</b>	<b>162</b>
<b>E Radiowave propagation in the Ionosphere</b>	<b>164</b>
<b>F References</b>	<b>169</b>
<b>G Problems</b>	<b>170</b>

<b>CHAPTER 8 ENVIRONMENTAL EFFECTS ON SPACE SYSTEMS</b>	<b>173</b>
<b>A Spacecraft Charging</b>	<b>173</b>
1 Introduction	173
2 Charging Mechanisms	173
3 Example of Spacecraft Charging – Geosynchronous Orbit	177
4 Design Considerations	179
<b>B Orbital Debris</b>	<b>180</b>
1 Space Operations and Orbital Debris	180
2 Hypervelocity Impacts	188
3 Impact Probabilities.	190
4 Design Considerations	192
<b>C Surface Effects</b>	<b>193</b>
1 Atomic Oxygen Effects	193
2 UV Degradation	195
3 Sputtering	195
4 Molecular Contamination	197
<b>D Homework</b>	<b>198</b>
<b>CHAPTER 9 ENVIRONMENTAL EFFECTS ON SPACE SYSTEMS - PART 2 RADIATION EFFECTS</b>	<b>199</b>
<b>A Passage of ionization through matter.</b>	<b>199</b>
1 Penetration of heavy charged particles	199
2 Interaction of Fast Electrons with Matter	202
3 Interaction of energetic photons with matter	204
4 Neutrons	205
<b>B Radiation Units</b>	<b>206</b>
<b>C Effects of Space Radiation on Systems</b>	<b>208</b>
1 Radiation Thresholds	209
2 Radiation Dose in the Belts	209
3 Solar Proton Events	220
4 Galactic Cosmic Rays	222
<b>D High-Altitude Nuclear Burst Effects</b>	<b>223</b>
1 Characteristics Of A Nuclear Detonation	223
2 Ionization Effects In The Atmosphere	225
3 Electromagnetic Pulse (EMP)	226
4 Deposition Region Generated EMP	226
5 System Generated EMP/Internal EMP	227
6 Artificial Radiation Belts	228
<b>E Design Considerations Relative to Radiation</b>	<b>229</b>
<b>APPENDIX 1 USEFUL EQUATIONS</b>	<b>231</b>
